SECTION 1.

Code Section 34-9-205, relating to the promulgation of a workers' compensation fee schedule, is amended by adding a new subsection (d) to read as follows:

"(d) The board shall annually review all of the medical services to which any fee schedule, published pursuant to subsection (b) of this Code section, applies and shall annually promulgate written guidelines and standards pursuant to which the providers of certain types of medical services, as designated in such guidelines and standards, may apply for and receive an exemption from such fee schedule. Fee schedule exemptions provided by the board shall not be limited to or based on the fact that a hospital or other medical facility that provides only one type of medical service, such as free standing rehabilitation or long-term acute care hospitals. The board shall promulgate written guidelines which shall exempt from the fee schedule the hospitalization, and other medical services, required by patients who have suffered certain designated types of injuries so that the injuries so designated reflect a wide disparity of initial patient injury acuity and a wide variance between the level of medical services required to treat such patients such that ultimately the level of medical charges resulting from the care and treatment of such patients may vary widely. Such exemptions shall be provided for, but not necessarily limited to, all of the medical services required by patients who have

1 suffered head injuries, burn injuries, spinal injuries, injuries requiring lengthy periods of
2 rehabilitation, or other such injuries. Notwithstanding the fee schedule exemption
3 required as specified in this subsection, the level of charges to be paid to the providers
4 of such exempt care shall be limited to the usual, customary, and reasonable hospital
5 charge levels prevailing in this state for the treatment of injured persons having similar
6 injuries and requiring similar levels of medical services."
